## Step 4: View Terms and Conditions For Health Screening

### Terms and Conditions ^

At Mount Alvernia Hospital, we provide personalised executive health screening in a modern and cosy environment using assessment tools such as the Body Composition Analyser (analyses sectional body fat in addition to body composition) and high resolution Visual Chart (to test for colour blindness). If you are looking for an advanced healthcare support and need a one-stop solution for all your healthcare related queries, then you can explore a range of health screening packages in Singapore to save on treatments.

Depending on your needs, you can opt for a basic screening or comprehensive packages. Our health screening services cater to both individuals and employees of corporate organisations. Customisable corporate health screening packages are also available.

You will receive a detailed individualised medical report. This will be reviewed during a private consultation with our doctor, who will explain and provide you with suitable recommendations based on your health profile.
